EDUCATION

Dr. Akhilesh Das Institute of Professional Studies
Bachelor of Technology in Artificial Intelligence and Data Science
GPA: **8.69/10** (3 semesters completed)

New Delhi, India
Aug. 2024 – May 2028

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, SQL
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Frameworks: React, Node.js, Express.js, Flask, FastAPI, Tailwind CSS
Databases: PostgreSQL, MongoDB, MySQL
Tools & Cloud: Git, GitHub, Docker, Postman, Vercel
AI & LLM: LangChain, LangGraph, RAG, Multi-Agent Systems, LangSmith
Concepts: REST APIs, JWT Authentication, OAuth 2.0, WebSockets, Full-Stack Architecture

PROJECTS

- Friend.ly - Real-Time Social Media Platform** | *MERN, Socket.io, JWT* [Demo](#)
- Built a full-stack real-time social platform with 10+ features including community servers, channels, messaging, follow systems, and notifications supporting concurrent multi-room communication via Socket.io pub-sub architecture.
 - Designed a modular REST API backend comprising 9 API modules, implementing JWT refresh token rotation, role-based access control across two permission tiers (admin, member), and RESTful services for core platform functionality.
 - Built a responsive React frontend with 12+ pages and a reusable component library for chat, feeds, and profile management, backed by MongoDB for scalable data persistence.
- LinkedIn & X Scraping RAG Chat Model** | *React, Flask, RAG, LLM* [Demo](#)
- Built a RAG-based conversational chatbot that ingests and analyzes professional profiles from LinkedIn and X across 6+ data categories including experience, skills, posts, and certifications.
 - Designed a semantic ingestion pipeline storing vector embeddings in a vector database; evaluated retrieval quality across 30+ public profiles to validate relevance of context-aware responses.
 - Integrated Groq-hosted LLaMA 3 for fast inference, enabling multi-turn conversational querying with context retention across profile analysis sessions.
- AI-Powered GitHub Profile Analyzer** | *React, Node.js, LangChain* [Demo](#)
- Built a developer analytics platform that evaluates GitHub profiles across 4+ dimensions - repositories, skills, contribution patterns, and project activity - using a modular LangChain-based backend.
 - Implemented dedicated free and premium analysis pipelines with graceful AI fallback handling, ensuring uninterrupted GitHub profile analysis during API or LLM failures.
 - Designed an interactive React dashboard with 10+ reusable components delivering AI-generated summaries, visual analytics, and resilient user feedback during API quota exhaustion.
- Vision Shift - A Visual Diff Engine** | *Python, Deep Learning*
- Developed a deep learning model to detect visual differences between images during a Hackathon.
 - Built comprehensive training, testing, and evaluation pipelines.
 - Optimized preprocessing and evaluation pipelines for accurate visual difference detection.

LEADERSHIP & ACHIEVEMENTS

- 1st Place - National Level Hackathon** | EdTech Track | Prize: 10,000
- Built a Visual Attendance System combining facial recognition (OpenCV) with QR-based identity verification; developed a real-time detection and validation pipeline using Python and Flask.
- Lead, Graphic Design** Ongoing
- DevSphereIndia – National Developer Community*
- Led the design team producing UI/UX assets, event banners, and promotional material; standardized brand guidelines and mentored junior designers.
